execon.

Looking for an effective way to increase conversion rate?
Are changes to your portal deploying too slowly?
Need to fix the functional error immediately?

01

Our tests allow you to quickly implement changes on the website (changes to offers, implementation of new unconventional offers, fixes of functional errors).
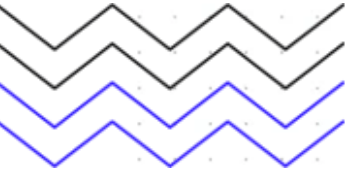

Reducing time-to-market, increasing online sales.

02

More than a traditional approach to AB tests verifying 2-3 hypotheses.

In-depth analysis of customer segments which prefer a particular variant of the site.

03

Suffering from limited resources for in-house analytics?

We provide full support for the test process: page analysis/auditing, hypothesis preparation, new solution designing & implementing, maintaining and reporting results.

04

Enabler for quick hypothesis, ideas, project verification without involving IT.

Huge saving of resources (time, money). You implement only what is validated.

05

We provide support in maintaining the AB tests under the 24/7/365 regime (SLA).

execon.

Automatically.

collected events

Events that do not require additional programming are automatically collected.

**01** Visiting pages, subpages.

02 Clicking on links.

All events are enriched by information about:

User's geographical location.
Operating system.

Browser.

Device IP address.

Traffic source.

Target address (in case of links).

User Agent.

Page titles.

Custom.
events

It is possible to configure any events that can be captured by JavaScript events.
Events can have an unlimited number of additional data dimensions, presented as a list of event attributes.

Examples of custom events:

Clicking on any of the elements.

Change of the content or display of dynamic elements.

User behavior (cursor position navigation trigger and others).

Purchasing products.

Adding additional services and accesories.

Change of product variant.

Completing a set of products.

Files downloads.
